

United International University (UIU)
Dept. of Computer Science & Engineering (CSE)

Mid Exam Summer 2023

CSE 2233/CSI 233: Theory of Computation/Theory of Computing

Total Marks: 30

Duration: 1 Hour 45 Minutes

Answer all questions. Figures are in the right-hand margin indicates full marks.

Any examinee found adopting unfair means will be expelled from the trimester / program as per UIU disciplinary rules.

1. Design **DFA**'s that accepts the following languages: 2.5 x 4
 - a) $L = \{w \mid w \text{ does not contain '101'}\} \mid \Sigma = \{0,1\}$
 - b) $L = \{w \mid w \text{ starts with an even number of 'a', contains 'ba' and ends with 'baa'}\} \mid \Sigma = \{a,b\}$
 - c) $L = \{w \mid w \text{ is a palindrome with a max length of 3}\} \mid \Sigma = \{0,1\}$
 - d) $L = \{a^i b^j \mid i \geq 0, j \geq 0, i + j \text{ is an odd number}\} \mid \Sigma = \{a, b\}$
2. Design **NFA**'s that accepts the following languages: 3 x 3
 - a) $L = \{w \mid w \text{ doesn't start with 'a' or 'b' and contains 'bbc' and ends with 'ab'}\} \mid \Sigma = \{a, b, c\}$
 - b) $L = \{w \mid w \text{ starts with '10' or '21' and contains '220' and ends with '112'}\} \mid \Sigma = \{0, 1, 2\}$
 - c) $L = \{w \mid w \text{ starts and ends with either 'xzy' or 'xy'}\} \mid \Sigma = \{x, y, z\}$
3. Consider the following NFA, and show with the help of **NFA-tree** whether the string **'0100110'** is accepted or not. 3

4. Convert the following NFA over alphabet $\Sigma = \{1,2,3\}$ to an equivalent DFA including the diagram.

4

	1	2	3
\Rightarrow a	{a,b,d}	{a,c}	{d}
b	ϕ	{a,d}	{a,e}
*c	{a,b,c,d,e}	ϕ	{b,c}
d	{d,e}	{d}	{a,e}
*e	{b,e}	ϕ	ϕ

5. Convert the following ϵ -NFA over alphabet $\Sigma = \{0,1\}$ to an equivalent DFA.

4
